

## Job Description

<b>Role</b>	Physical Properties Analyst
<b>Location</b>	Alderley Park, Cheshire, England
<b>Job Type</b>	Permanent
<b>Salary</b>	£30,000-£50,000
<b>Date posted</b>	28th January 2021
<b>Start date</b>	Negotiable - Q2/Q3 2021

### The Company

Sai Life Sciences is an expanding Contract Research & Development and Manufacturing Organisation (CDMO) working with 7 of the top 10 pharma companies globally, as well as many leading smaller biotechs. We work with our clients to accelerate the discovery, development and manufacture of complex small molecules for a healthier tomorrow. With more than 2000 staff globally and ambitious growth plans, our vision is to support our global innovator partners to bring 25 new medicines to life by 2025.

Marking the completion of 20 years since inception in 2019, the company began an organisation-wide initiative to significantly expand and upgrade its R&D and manufacturing facilities, deepen scientific & technological capabilities, strengthen automation and data systems, and above all raise the bar for safety, quality and customer focus. Guided by the insights and feedback from its customers, it committed to investing over US\$150M between 2019 and 2023. Part of this investment in 2020 were the new state of the art laboratories in our centre of excellence for process chemistry and analytical development at the Alderley Park Biotech & Life Science Cluster, where we are now looking to significantly expand both staff numbers and capabilities. Our team currently consists of 24 multi-disciplinary scientists (chemists, analysts and engineers).

Non-GMP manufacture of kg quantities of intermediates and APIs is currently possible within our bespoke Scale-up laboratory facility. During 2021 a new GMP Kilo-lab facility will be created capable of multi-kg quantities of GMP API suitable for early phase clinical studies. The developed processes may then be transferred to Sai's manufacturing sites in India for further scale-up as required.

This is a great opportunity to work with an expanding global organisation and work closely with some of the most innovative biotech and pharma companies on their most important programmes.

### The Role

- You will join a team that identifies, develops and optimises synthetic routes to APIs, supporting both early and late phase development.
- The successful candidate will either have a technical grounding in analytical chemistry with proven knowledge in the physical properties testing of API with experience in a relevant industry or will be someone who has recently completed (or who will complete during 2021) a BSc, MSc, PhD or Post-doctoral research project with a specialism in API Physical Properties testing.
- Experience in contracting physical properties testing with third parties and discussing physical properties data with customers would also be advantageous.
- Demonstrated analytical expertise in supporting the determination of form and particle characterisation.

- The candidate is expected to conduct practical, laboratory based physical properties testing in support of the development of routes and processes and then scale-up to manufacture.

### **Essential Requirements**

- Higher or bachelor's degree in a life sciences topic with relevant experience working in an Analytical Chemistry laboratory.
- Experience of the use of techniques such as XRPD, microscopy, thermal (DSC, TGA) and particle sizing for the characterisation of APIs.

### **Key Roles and Responsibilities**

- Developing, troubleshooting and appropriate validation of Physical Properties methods.
- Supporting project teams operating to tight deadlines.
- Executing analytical work to meet project timelines with minimal supervision.
- Able to work effectively in a GMP laboratory.

### **Key Attributes**

- Learning agility in the utilisation of new techniques or applications to support projects.
- Ability to solve complex scientific problems.
- Good communication; both written and verbal.
- A team player.
- Conscientious with a can-do attitude with good attention to detail.
- Experience in the use of IT packages such as Word and Excel.

### **The Offer**

- A competitive Salary and Benefits package including company pension, health and life insurance, 25 days holiday per year and enhanced family leave.
- Work in a state-of-the-art facility on one of the country's leading Biotech & Life Science Parks.
- Flexible working hours and conditions to suit the right candidate.

### **Next steps**

Please send your CV and cover letter to [recruitmentuk@sailife.com](mailto:recruitmentuk@sailife.com) with details of the role that you are applying for.

As an Equal Opportunities employer, we welcome applications from all suitably qualified persons regardless of their race, sex, disability, religion/belief, sexual orientation or age.

Please note that Sai Life Sciences Ltd is unable to sponsor the visas for any candidates for the above role.
