

Pain Models

Acute Pain

- Hot plate test
- Tail flick test
- Paw pressure test

Acute Tonic/ Persistent Pain

- Formalin test

Inflammatory Pain Models

- Complete Freund's Adjuvant (CFA)
- Carrageenan inflammation model (Paw edema)
- Kaolin-Carrageenan induced arthritis in rat

Osteoarthritic Pain

- Mono-iodoacetate induced

Post-Operative Pain

- Acute post operative pain (Brennan model rat & mice)

Neuropathic Pain Models

- STZ Model of Diabetic Neuropathy Pain in Rat
- Cisplatin/ Paclitaxel induce peripheral neuropathic Pain.
- Oxaliplatin induce peripheral neuropathic Pain.
- Chronic Constriction Injury model (Sciatic nerve ligation).

- Spinal Nerve ligation (L5 & L-6)
- Spared Nerve Injury (mice & rat)
- Trigeminal Neuralgia
